

I would like to stop the cell phone useage on aircraft while inflight. This will cause a lot of problems for flight attendants and endanger the safety of other passendgers. Here are several reasons:

- * There is no hard evidence that cell phone use doesn't interfere with navigational instruments.
- * Cell phone use would enable terrorists to coordinate a plan of action more effectively.
- *The NPRM would leave it up to flight attendants to police the use of cell phone onboard the aircraft compromising our ability to maintain a safe, secure cabin environment and to conduct emergency evacuations.
- *It would make an already tense cabin environment even more stressful.

Please take under consideration the stress flight attendants already have with unruly passengers who insist now on using their cell phones when asked to turn them off, inflight use of cell phone will really cause problems.
